---

I am self-motivated and enthusiastic in the field of Full Stack Web Developer with in-depth expertise in JavaScript, NodeJS, NextJS, and React. I have applied these skills in various real-world projects, including my internships at the startups Betr Beta and Hedra.id. I also successfully developed a company profile website for a national association (APSMKSI). This experience has equipped me with a comprehensive understanding of web development and agile team workflows, complemented by certifications from Dicoding, Codepolitan, and Alibaba Cloud. With my ability to learn quickly and my diverse background, I am confident in my capacity to make a significant contribution to a dynamic team.

---

## EXPERIENCE

**Junior Front-End Developer & Automation Engineer | Hedra.id**          **Sept 2024 - Present**

Responsible for developing responsive user interfaces using React and Next.js for a growing tech media startup. Also designed and implemented workflow automation systems using Zapier and Make.com.

**Full Stack Developer (Project-Based) | APSMKSI**          **Nov 2024 - Present**

Built, deployed, and Maintaining the official website for a national academic association, Association of Islamic Financial Management Study Programs (APSMKSI), comprising 14 universities across Indonesia. Developed and deployed via Virtual Private Server (VPS).

**Full Stack Developer (International Internship) | Betr Beta (Singapore)**          **May 2024 - Aug 2024**

Contributed to full stack development for a Singapore-based startup, including user authentication, dashboard features, and backend API integration. Worked collaboratively in an agile environment and cross-functional team.

**Head of Journalism Division | Media Communication Organization**          **2018 - 2020**

Led a student journalism team responsible for school magazine publications and social media content. Oversaw editorial processes, content planning, and provided mentorship on writing and visual storytelling.

**Volunteer Content Creator | Literacy Youth Community**          **2017 - 2020**

Created educational social media content focused on literacy awareness and youth empowerment. Participated in digital campaign planning to promote reading culture among students and society.

**Independent Developer | Personal Projects**          **2020 - Present**

Freelance / Self-Initiated
- **PDF Chat AI**: An AI-powered app that enables conversational interaction with uploaded PDF documents.
- **Digital Marketplace with Built-in CMS**: A custom e-commerce platform featuring a fully integrated content management system.
- **Realtime Workspace Note App (Finance-Oriented)**: A Notion-style productivity app with additional features for income/expense tracking and personal budgeting tools.

---
